OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

A MEDIUM OF THE R.R.I.'S SERVICE TO ESTATES
Articles are of direct practical use to planters.
Publication is on the first of each alternate
month, issues being successively numbered.

19

59

R R I

LOCATION. The Institute's laboratories and offices at the third mile, Ampang Road, Kuala Lumpur are open from 8 am to 1 pm and 2 pm to 4 pm on Mondays to Fridays, and from 8 am to 12.30 pm on Saturdays.

EXPERIMENT STATION AND FACTORY. This station of the R R I is situated 16 miles from Kuala Lumpur, at Sungei Buloh on the Kuala Lumpur — Kepong — Kuala Selangor road. Visits may be made on Mondays or Wednesdays by arrangement. There is a guest house.

CORRESPONDENCE. All LETTERS must be addressed to the Director, Rubber Research Institute of Malaya, Post Office Box 150, Kuala Lumpur. Special enquiries may be marked for the attention of particular officers. The address for TELEGRAMS is Searching, Kuala Lumpur. TELEPHONE: Kuala Lumpur 72051. PARCELS occasionally arrive without any indication of their origin. Senders' names and addresses should be written clearly on the outside of all packages, and advice of despatch should be given by letter or telegram.

PROHIBITED PLANT SPECIMENS. Attention of planters and others in territories outside the Federation of Malaya and the Colony of Singapore is drawn to the Malayan Plant Importation Rules which prohibit the importation into Malaya of any part of a plant, whether living or dead, unless it is accompanied by a permit issued by the Director of Agriculture, Federation of Malaya. No permit will be issued in respect of any diseased plant or any plant pest. Any plant imported in contravention of these Rules (whose object is to prevent the introduction of diseases or pests) will be destroyed without examination. Anyone outside Malaya who desires our advice on any matter that may require examination of living material must first enquire by letter.

ADVICE. Enquiries are invited from rubber producers in the Federation of Malaya, Singapore, the colony of North Borneo, and the territories of Sarawak, Brunei and Nigeria, who may require more detailed information applicable to their own special problems. Where it is considered necessary, visits will be made to estates in Malaya as convenient. Visits to estates in other territories are by special arrangement. The only visits for which charges are normally made are those of our clone identification inspectors. INTERVIEWS should be arranged by letter, as members of the senior research and advisory staff are frequently absent on visits to plantations.

PUBLICATIONS. Subscription to all or any of our series of publications (*Planters' Bulletin*, *Journal*, *Reports*, and miscellaneous booklets) may be made by depositing \$15 with us. An annual statement of account will then be submitted. We are unable to give annual subscription rates or any form of discount, but for multiple subscriptions a lower rate of initial deposit is acceptable. Postage is charged on oversea mailings. A list of 'Publications of the R R I' is available on request.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

Kuala Lumpur

1959

Main Contents

Planters' Bulletin 40

Page

Editorial: Critical Interpretation of Yield Records	1
Planting Recommendations, 1959-60	3
Note: Natural Root Graft	10
The Soil Block Method of Establishing Legume Covers	11
Spray Nozzles	17
Notes: Root Disease and Replanting	21
Rooted Clones	22
American Reaction to TC Rubber	23
Skim Rubber	23

Planters' Bulletin 41

Editorial: Research and Efficiency	27
RRIM 600 Series Clones	28
Rock Phosphate versus Superphosphate	34
Fire Damage and Borers	36
Warm-Blooded Animals	38
Note: Planting Material for Sale	41
Direction and Slope of Tapping Cut	42
Insulation of Tunnel Driers	43
Notes: Chromosomes of <i>Hevea brasiliensis</i>	47
Effect of High Water Table on Growth of Tap Root	47
Control of Cockchafer Grubs in Young Rubber	48
Estates' Advisory Service	49

Planters' Bulletin 42

Editorial: Classified and Special Rubbers	51
Nurseries: Establishment and Maintenance	52
Manganese Deficiency	57
Foreign Exchange Clones — 1954 Collection	59
Technical Classification of Rubber	62
SP Rubbers During 1958	70
Note: Exemption of Special Rubbers from Australian Import Duty	71

Planters' Bulletin 43	Page
Editorial: From 'Synthetic' to 'Synthetic Natural'	75
Disposal of Skim Serum	76
Assessment of the Growth of Clone RRIM 501	78
Wind Damage	79
Ladder Tapping of Budded Trees: Height of Opening	93
Checking the Spread of Root Disease	95
Notes: Boric Acid for the Preservation of Low	
Ammonia Latex Concentrate	96
Mouldy Rot Fungicides	97
Rhizobium Compost Culture	97
'Maladies of Hevea'	97

Planters' Bulletin 44

Editorial: Weedkillers	99
Control of Weeds on Malayan Rubber Estates	100
Transplanting Stumped Buddings	116
SP Rubbers in the First Half of 1959	120
Approved Fungicides for Mouldy Rot Control	121

Planters' Bulletin 45

Editorial: The B.R.P.R.A. Technical Service	125
Note: Wind Damage: PB 86 and PBISG Clonal	
Seedlings	126
Stimulation of the Yield of Rubber Trees	
as a Routine Estate Practice	127
SP Rubber in Japan	142
Developments in the Propagation of Hevea	143
Notes: Revision of Planting Recommendations 1959-60	148
Tree Poisoning with 2,4,5-T	148
RRIM 500 and 600 Series Clones, Clone	
LCB 1320 and Exchange Clones: Sale	
and Export	149
INDEX	150
